DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, in section b, c, d, e and f, the phrases "the modules may" is not further limiting. No positive recitation has been set forth.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Unrein [US 2002/0001175].

Regarding claim 1, Unrein discloses a computer system comprising a plurality of distinct backplane modules (figure 3), wherein a first backplane module (301) comprises a plurality of high speed point to point connectors (307) to receive power from at least one power supply backplane module (paragraph 36) to distribute the power to the

backplane module other than first module and power backplane modules (paragraph 34).

Claim Rejections - 35 USC § 103

- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Unrein in view of Draughn et al. [US 6,349,037].

Regarding claim 2, Unrein discloses everything claimed except the specific use of an active switch fabric card being used with the backplane.

Draughn et al. disclose an electrical backplane (A) using an active switch fabric card (E1).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to use the switch fabric card with the backplane of Unrein, as suggested by Draughn et al., for the purpose of providing cross point switching.

7. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Unrein, as modified, as applied to claim 2 above, and further in view of Cannella, Jr. et al. [US 6,144,561].

Regarding claim 3, Unrein, as modified, disclose everything claimed except the high speed point-to-point data connections using optical links and/or connectors.

Cannella, Jr. et al. disclose a backplane (figure 2) having an optical links connection card (18, column 5, line 66 column 6, line 17).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to use the optical link type connector with the backplane of Unrein, as modified, as suggested by Cannella, Jr. et al., in order to facilitate optical connections to the backplane.

Conclusion

- 8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
 - Petit et al. [US 4,703,394] disclose a system for interconnecting orthogonally disposed printed circuit boards and switching networks employing same; and
 - Duffy et al. [US 2002/0199203] disclose a switched digital video gateway.
- 9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hung S. Bui whose telephone number is (571) 272-2102. The examiner can normally be reached on Monday-Friday 8:30AM-6:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kamand Cuneo can be reached on (571) 272-1957. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
